# MY CITY HOSPITAL AI

## Smart Hospital Chatbot & Reception Management System

An enterprise-grade full-stack digital solution engineered to automate patient inquiries, streamline front-desk operations, and empower hospital administration.

🚀 LIVE PRODUCTION DEPLOYMENT
**hospital-chatbot-with-full-stack-ten.vercel.app**

**Developed by Abdullah Tariq | Tech: React.js • Node.js • Express • MongoDB**

THE CHALLENGE

# The Healthcare Information Bottleneck

### 📞 Endless Phone Queues

Patients and attendants spend hours on busy telephone lines just to inquire about doctor availability, OPD schedules, and consultation fees.

### ❌ Information Friction

Lack of instant, transparent access to specialist doctor profiles, degrees, and timings causes severe patient frustration and delays.

### ⏳ Front-Desk Overload

Reception staff are constantly overwhelmed by repetitive queries regarding lab test prices, X-ray rates, and ultrasound charges.

### 📋 Manual Admin Inefficiencies

Traditional hospitals lack centralized digital tools to update doctors, services, and pricing dynamically across patient touchpoints.

THE SOLUTION

# My City Hospital AI: Unified Ecosystem

## 🤖 24/7 Intelligent Patient Chatbot

- Provides instant conversational answers to patient queries anytime.
- Supports natural language input in **English, Urdu, and Roman Urdu**.
- Instantly delivers doctor timings, specializations, consultation fees, and diagnostic pricing.
- Guides patients smoothly toward appointment booking and contact options.

## 🖥️ Secure Reception & Admin Panel

- Empowers hospital staff with a centralized dashboard to manage operations.
- Allows real-time addition and updating of doctor profiles, schedules, and degrees.
- Enables instant modification of laboratory test rates, X-ray fees, and hospital services.
- Ensures zero hard-coded bottlenecks with a robust MongoDB backend.

LIVE PRODUCT VIEW

# Patient Chatbot & Natural Interface

Designed for maximum accessibility, allowing patients to type queries naturally or click quick-suggestion pills for instant answers.

My City Hospital UI

CORE MODULES

# Doctor Profiles & Diagnostic Catalog

## 🩺 Doctor Management

- Maintain comprehensive doctor directories with names, degrees, and sub-specialties.
- Manage exact consultation days, shift timings, and department info.
- Set and update individual consultation fees instantly.

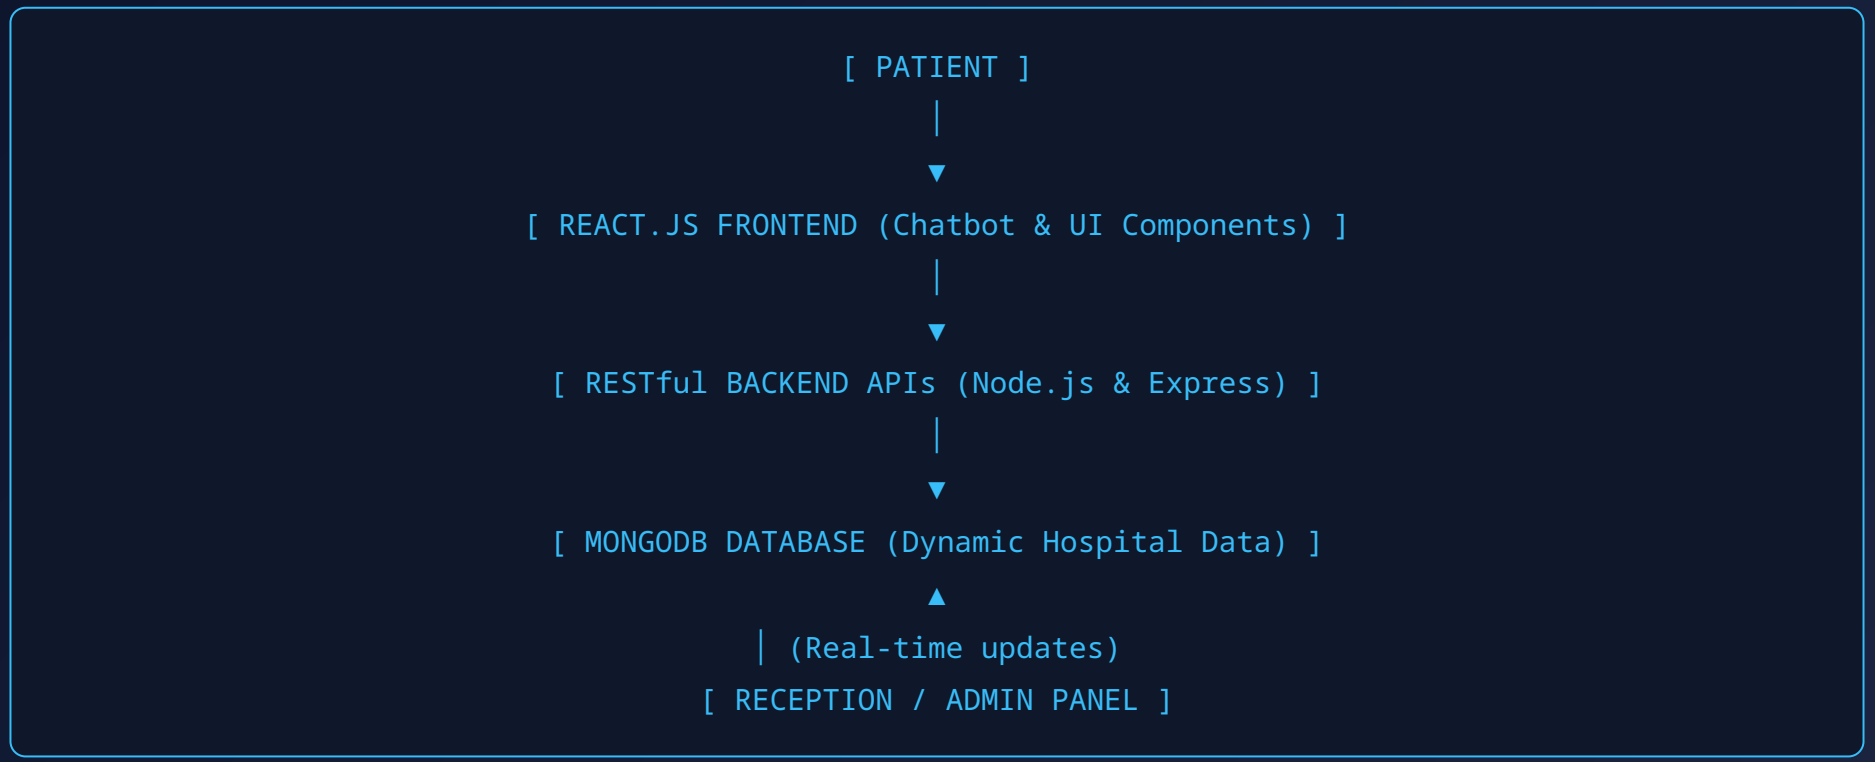

## 🧪 Laboratory & Services Catalog

- Transparent pricing for blood tests, pathology, and diagnostics.
- Instant rates for X-rays, Ultrasounds, and specialized scans.
- Clear visibility into 24/7 emergency, lab, and pharmacy schedules.

SYSTEM ARCHITECTURE

# Robust Full-Stack Engineering

Built using a modern decoupled architecture ensuring high performance, instant data synchronization, and complete scalability.

VALUE PROPOSITION

# Strategic Impact Across the Hospital

## 👤 For Patients

- 24/7 instant access to hospital info.
- Zero phone wait-times.
- Natural Roman Urdu conversation support.

## 👩‍💼 For Reception Staff

- Massive reduction in repetitive phone calls.
- Streamlined daily front-desk workflow.

## 🏥 For Hospital Management

- Centralized digital control over pricing, doctor schedules, and announcements.
- Enhanced institutional branding and modern patient-centric image.
- Scalable infrastructure ready for multi-branch expansion.
- Complete elimination of hard-coded frontend maintenance.

ROADMAP & CONCLUSION

# Future Expansion & Scaling

Online lab test report portals • Automated WhatsApp/SMS appointment reminders • Multi-branch support • Role-based staff security accounts.

# MY CITY HOSPITAL

*“A smarter digital experience for patients and hospitals.”*
